

Project:	Feasibility Study for Installation of up to 1 MW Photovoltaic Power at Malé Power Station
Total Capacity:	up to 1MW _{el} . Photovoltaic power generation capacity
Location:	Malé, Republic of Maldives
Time:	Oktober 2003 to April 2004
Client:	STELCO – State Electric Company Ltd., Malé
Services:	Preparation of a feasibility study to install up to 1 MW photo-voltaic (PV) power generation systems in Male´
Details:	Overview of available PV technologies as well as technical and financial viability of projects, survey of available areas for PV power generation installation close to STELCO power station, financial analysis.

Potential solar collector areas on and close to STELCO power plant
